Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Claim 1 was discussed. Applicant's representative will amend the claim to distinguish the weighting of the claimed invention from the weighting of the prior art. The prior art uses an average interference radiated to all the unintended receivers to determine the amount of the weights. Claim 24 was discussed. Applicant's representative will amend the claim or provide remarks regarding the combination of Raleigh and Haartsen. Applicant's representative does not feel the references are combinable. Clarification regarding the probing signals in both the claimed invention and the references was provided.

Brief Description of Arguments to be Presented:

Raleigh does not suggest selectively varying an interference reduction algorithm between different non-target receivers, so any "nulling" is not controllably different for particular receivers. May also request brief clarification of scope of Haartsen teaching.

An interview was conducted on the above-identified application on 2/4/2008.

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
